I began my relationship with Wright-Patt Credit Union, Inc.(WPCU), while looking at the benefits of a credit union for my employees. After meeting with WPCU I became aware of the benefits they could also offer my corporation. I did not realize that a credit union did commercial banking. That is when WPCU introduced me to Cooperative Business Services, LLC (CBS). Together, they put together an extremely competitive financing package in a very timely and professional manner. Their personnel are very helpful and the day to day business that we have with them as a member of their Select Employer Group makes banking very quick and easy. We are glad to have WPCU and CBS as part of our family.

We structured a smart, customized financing package for Ishmael Precision Tool Corporation and we can do the same for you and your company.
